Objectives

At the conclusion of this program, participants will be better able to:

- Develop a program for vaginal birth after cesarean section in an Indian Health Service setting.
- Develop a program for emergency care of infants and children in an Indian Health Service setting.
- Determine when to perform a peri-mortem cesarean section.
- Outline changes in the newborn resuscitation algorithms.
- Outline how personal, societal, and cultural factors influence how providers offer prenatal genetic counselling
- Discuss the proper usage of mifepristone for medical abortion.
- Discuss the role, if any, of mifepristone in an Indian health setting.
- Develop a teen pregnancy prevention program in an Indian health setting.
- List three non-contraceptive health benefits of oral contraceptive use.
- Discuss the pharmacologic differences between types of oral contraceptives
- Discuss medical conditions in which oral contraceptives may and may not be safely prescribed.

- Outline changes in the recommended schedule of immunizations for children.
- Recognize risk factors for suicide in gay adolescent males.
- Review strategies to prevent postpartum hemorrhage.
- Review the management of postpartum hemorrhage.
- Outline the role and pathophysiology of HPV in the development of cervical neoplasia.
- Discuss the current role of HPV hybrid capture testing in the management of cervical neoplasia.
